

New generation AI proctoring solution

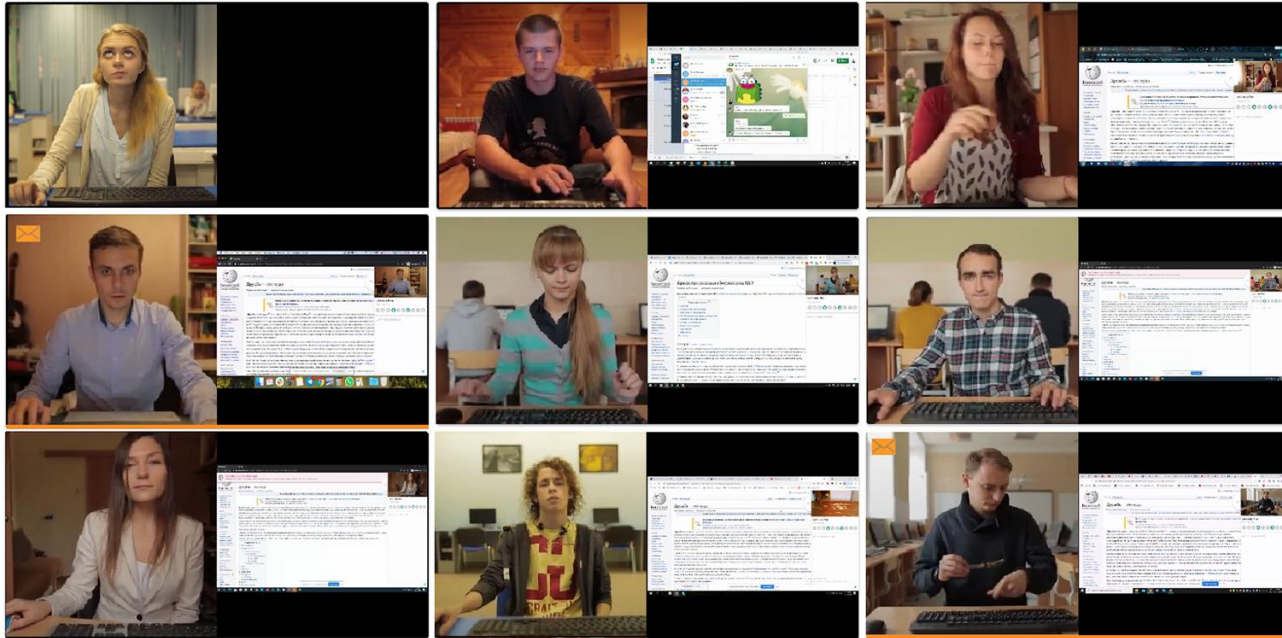

The tool to monitor students behavior in
online education

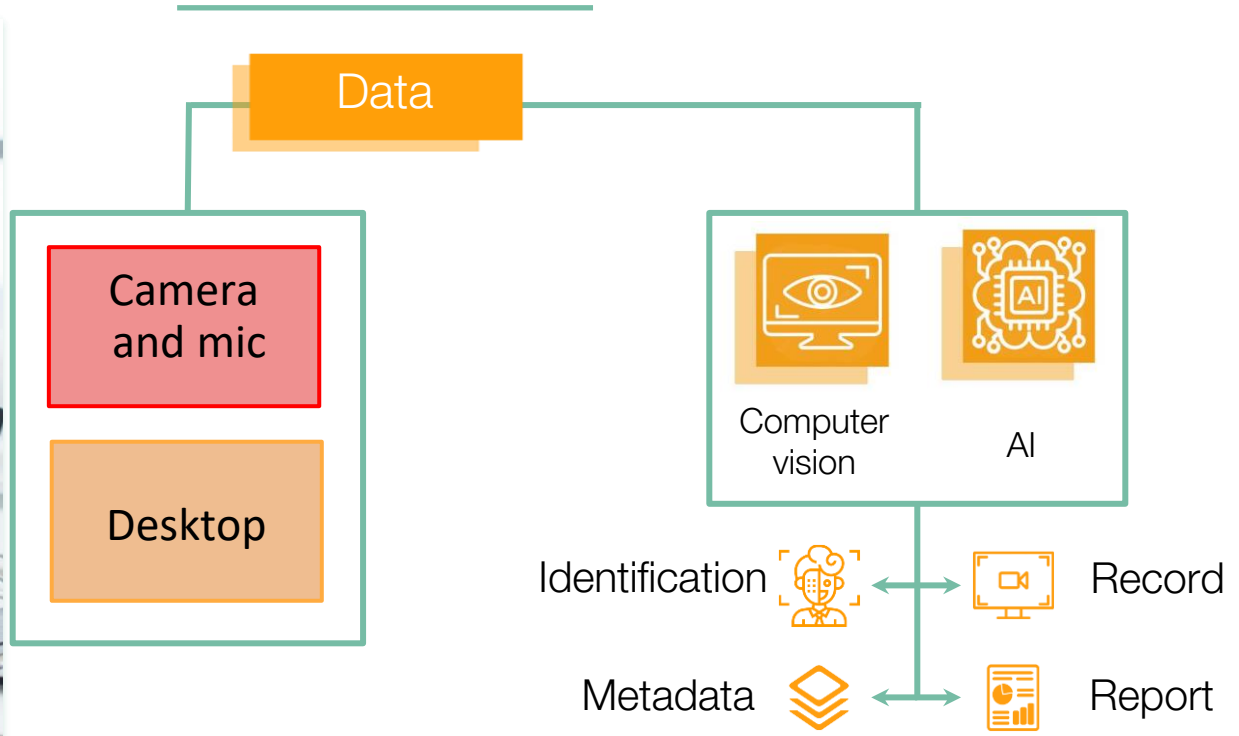

What is proctoring?

examus

Proctoring Calendar Archive

How Examus works

Examus cluster and OpenAPI give absolute flexibility

Works with

Works on

Market segments Examus deals with

- Universities and schools
- MOOC platforms
- Educational companies that have their own platform for online learning and testing
- Testing centers
- Certification centers (issuing language, medical, etc. professional certificates and permits for hazardous production levels)
- Corporate customers who conduct internal employee training and evaluation
- Companies that conduct assessment by order of corporate clients
- HR agencies that conduct mass online testing of candidates

Features

AI proctoring features

Face recognition

Person identification

Gaze detection

Speech detection

Absence of the person

Unauthorized person

Tab change

Secondary monitor

Smartphone usage*

Earphones usage*

** for exams of long duration may require additional time for post-processing (due to significant server load)*

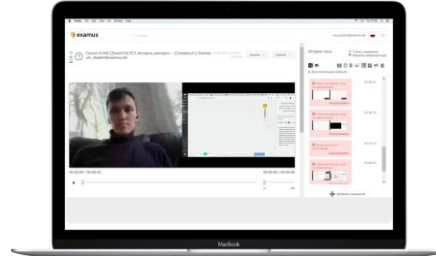

Three proctoring options

1. Automated

- Test-taker identification
- Recording audio, video and desktop
- Detailed report on violations
- Violation probability calculation

2. Post-review

Automated **PLUS**
post-review exam
recording by proctor

3. Real-time

Automated **PLUS**
real-time monitoring
and exam control by
proctor

Different working modes

Parameter	Link generator (without integration)	Examus App	API - integration
Usage case	Small-scale assessment projects to be run without LMS or based on a custom testing system	Assessment projects that require maximum control over test-takers' behavior	Long-term assessment projects with maximum usability and ease of exam set up
Implementation time	Immediately (or after checking the systems' compatibility, if required)	Within 1-2 days (after checking the systems' compatibility and linking the app to be installed by the users)	Within 2-4 weeks (depending on the particular LMS / testing system)
Advantages	Customer has full control over the exam set up, scheduling and procedure with Examus providing support and service	Additional lockdown features to the proctoring functionality	One-stop solution with full Examus functionality available within the Customer's LMS

Examus

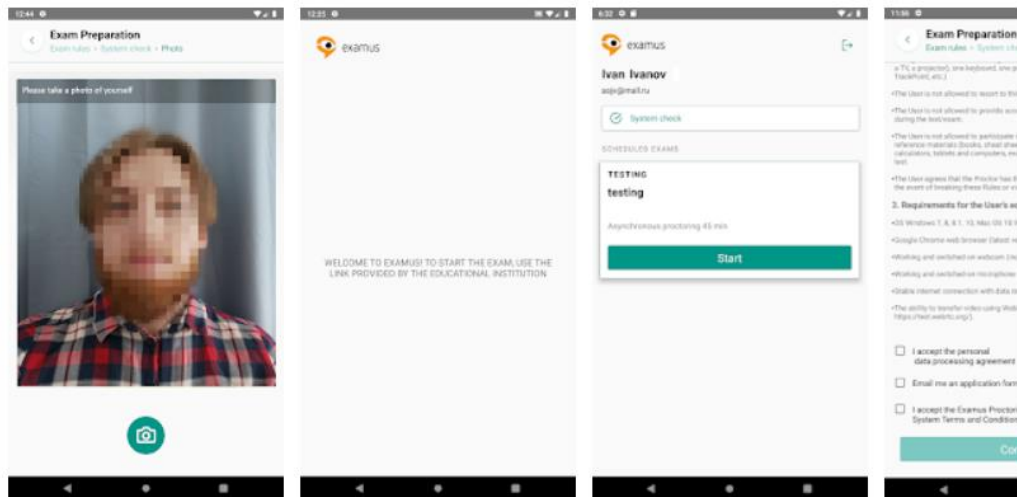

Examus Education

PEGI 3

This app is available for your device

Add to Wishlist

Install

Mobile App

Examus Mobile App

- webcam video / desktop recording
- lockdown features
- post-exam review of recordings by a human proctor

Mobile App Features

Mobile app feature	iOS app	Android app
Proctoring mode	Post-review	Post-review
Special lockdown regime	Yes (<i>special approval from Apple was received</i>)	Yes
Web camera video recording	Yes	Yes
Desktop recording	-	Yes

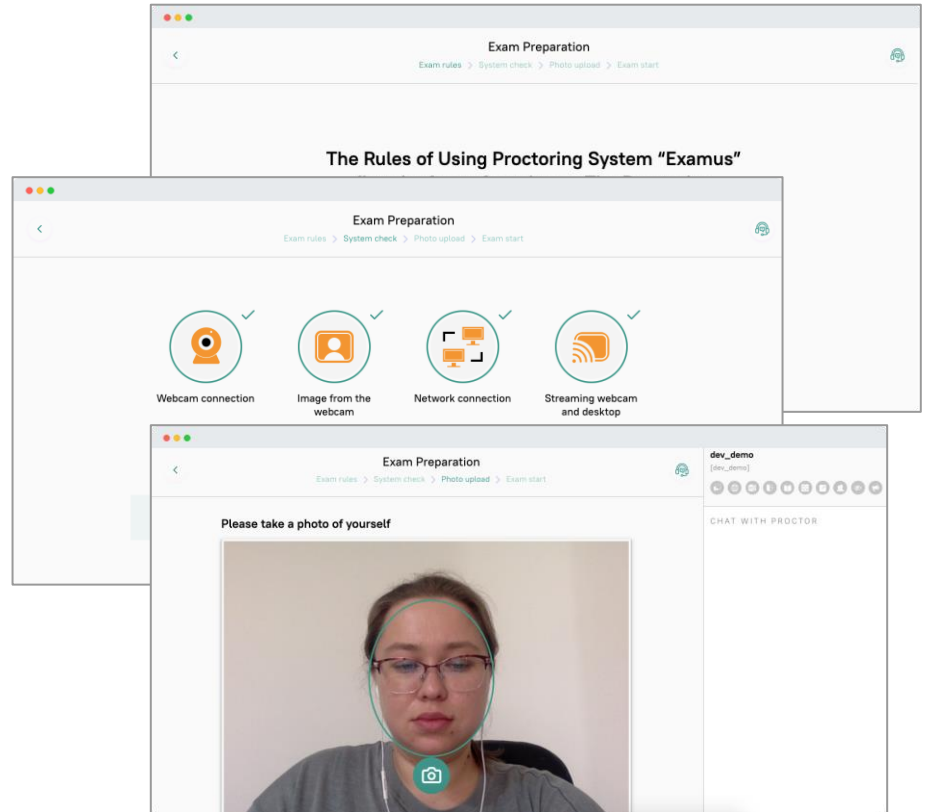

User Interfaces

Proctored exam for students

Seamless procedure for students:

- Log in to their usual platform
- Find a test and click a link to Examus
- Read exam rules
- Go through system check
- Take photo (+photo of ID)
- Show working area
- Take exam

3 types of user identification

Identification by human

- student's webcam photo
- student's ID webcam photo
- human proctor compares 2 images

Identification by AI

- student's webcam photo
- student's profile photo (received from LMS)
- AI compares 2 images

Biometric identification*

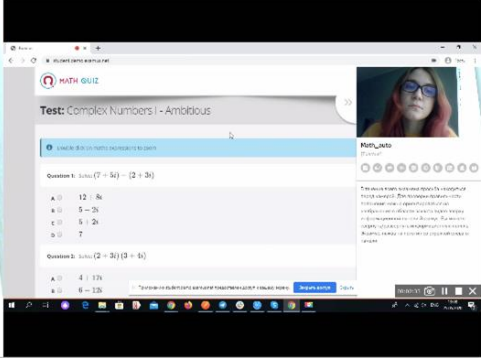

- ID verification
- liveness check
- optional check via external biometric provider

** an extra fee will apply due to the use of a 3rd party solution*

Interface for post-review proctoring

Logo Back to the list anastasia@exam.us

Chat: Alerts only Show cyberproctor

Custom rules

- Student Student** 00:02:28
 Active window has been changed Confirm
- Student Student** 00:02:34
 Looking away from the screen  Confirm
- Student Student** 00:02:51
 Looking away from the screen  + Add a warning

Features for post-review proctoring

- browsing videos in video archive
- filtering videos in video archive
- verifying student's photo and ID
- viewing synchronized videos from student's webcam and desktop
- playback of sound from student's microphone, synchronized with video
- reviewing alerts about possible cheating attempts from AI algorithms, confirming violations or deleting alerts
- adding violations
- setting exam status

Interface for real-time proctoring

The interface displays a grid of 12 student video feeds, each with a small inset showing the student's active window. The top navigation bar includes the 'examus' logo and links for 'Proctoring', 'Calendar', and 'Archive'. In the top right corner, there are icons for a globe and a refresh symbol.

The sidebar on the right contains the following alerts and controls:

- Active window has been changed:** A small thumbnail of a document window is shown above the text. Below the text are three red control buttons: a plus sign, a minus sign, and an exclamation mark.
- Human voice detected:** Below the text are three red control buttons: a plus sign, a minus sign, and an exclamation mark.
- Looking away from the screen:** A small thumbnail of a student looking down is shown above the text. Below the text are three red control buttons: a plus sign, a minus sign, and an exclamation mark.
- Looking away from the screen:** A small thumbnail of a student looking down is shown above the text. Below the text are three red control buttons: a plus sign, a minus sign, and an exclamation mark.

Features for real-time proctoring

- monitoring several students simultaneously by one proctor
- receiving and verifying student's photo and ID
- admitting students to the exam
- viewing videos from student's webcam and desktop
- hearing sound from student's microphone
- receiving alerts about possible cheating attempts from AI algorithm
- messaging students
- stopping exam
- setting exam status

Post-review vs. Real-time

Parameter	Post-review mode	Real-time mode
Human proctor	Reviews the recording in video-archive	Monitors students in real-time during the exam
Time allocation	1 hour long exam recording can be reviewed in 6-10 minutes	Proctor monitors up to 10 students simultaneously, but should do it during the whole exam
Cyber-proctor performance	<ul style="list-style-type: none">• most of violations are detected during the exam,• smartphone/headphones are detected on the server-side in post-processing*	<ul style="list-style-type: none">• most of violations are detected during the exam,• smartphone/headphones are detected by human proctor
Limitations by number of simultaneous exam takers (per server)**	10,000 (up to 25,000 according to the load testing)	500

* for exams of long duration may require additional time for post-processing and additional fee (due to significant server load)

**the required load should be specified in a Work Order and may require Examus team some time to scale the server

Administrative features

- managing exam sessions
- managing exam parameters*
- managing students*
- managing proctors
- managing cheating score calculation parameters
- viewing scheduled exam sessions
- setting up and exporting reports with stats on violations

**in the case of integration with LMS it can be managed in LMS*

Exam settings

Exam rules | Scoring

Cheater threshold ⓘ

Violations multiplier ⓘ

Second person in frame	<input type="text" value="1"/>
The student replaced	<input type="text" value="1"/>
The student is absent	<input type="text" value="2"/>

Wrong gaze direction	<input type="text" value="1.5"/>
Active window changed	<input type="text" value="1"/>
Forbidden hardware	<input type="text" value="1"/>
Microphone voice detected	<input type="text" value="1"/>
Phone is used	<input type="text" value="1"/>

Step 1

Set the multiplier for each type of violation: which behaviors matter more to you?

Exam rules Scoring

Cheater threshold ?

80

Violations multiplier ?

Second person in frame

Phone is used

1

Save

 Remove exam

Step 2

Set the cheating indicator threshold; you can play around with trigger points for past sessions to find suitable values

The screenshot displays the 'Archive' section of the examus application. On the left is a navigation sidebar with options: Home, Sessions, Calendar, Duty, Exams, Archive (selected), Staff, Companies, Students, and Reports. The main content area is titled 'Archive' and includes a search bar and a 'Filters' button. Below this, it states 'FOUND 4146 SESSIONS' and offers sorting options: 'Newest first' and 'Without sorting by violations'. Three session entries are visible, each with a profile picture, ID, name, date range, and review information:

- #8018 Test User qwe@qwe.qq [Exam#705] Clock Normal 123 3/19/2020, 9:21:21 PM - 4/13/2020, 2:03:25 PM
- #7232 v.istomin+student@stage.examus.net [Exam#659] Clock Olympics 123 11/15/2019, 11:35:28 PM - ?
- #8905 test@certiport.com [Exam#1107] MS Office offline Certiport 12/24/2020, 9:40:37 PM - 12/24/2020, 9:47:16 PM

At the bottom of the main content area, there are three tabs: 'Status', 'Violations', and 'Scoring'. Below these tabs, a large slider is shown with the text 'Threshold: 80' above it. To the right, a settings panel is open, showing various filter options (All statuses, All session proctor levels, All companies, All exams, All courses, All tutors, All proctors) and a 'Clear filters' button. A red box highlights the 'Threshold: 80' slider in the settings panel.

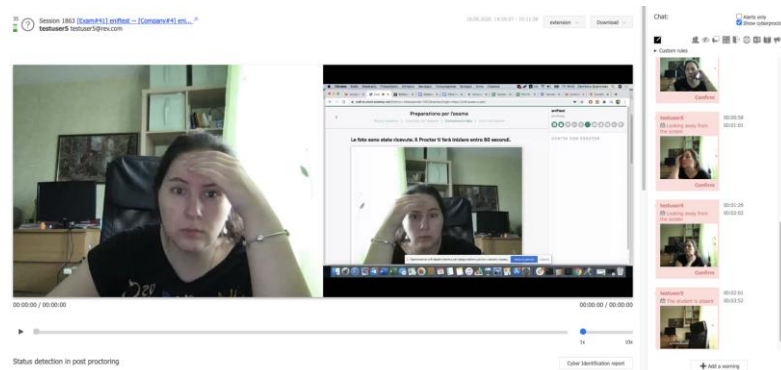

Step 3

Once the exam has passed, you can inspect a few sessions and verify that the cheating indicator shows accurate results.

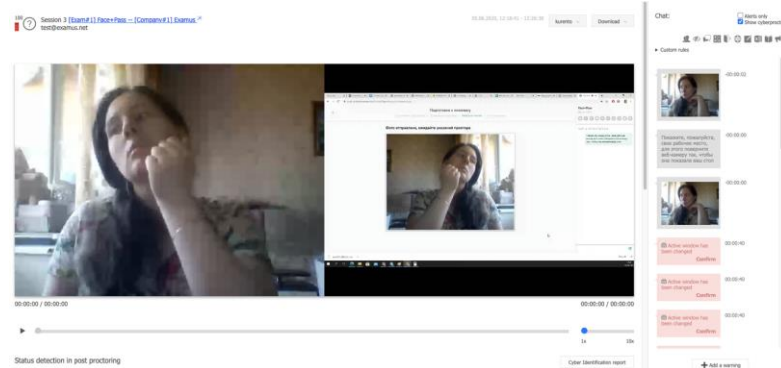

At that point, you can make changes to the multipliers and the threshold if you need better precision.

This session should pass

This session should NOT pass

Step 4

Go to the exam configuration and try different settings

Threshold

10. Active window has been changed	00:02:04.93	00:02:15.93	00:00:11.00

Timeline visualization showing event durations from 00:00:00 to 00:15:21. Events are represented by colored bars: green for 'Active window has been changed', red for 'Another person in the frame', purple for 'The student is absent', teal for 'Looking away from the screen', and blue for 'Human voice detected'.

Session score sample

Session report: Timeline ↴ Violations table →

Now it's clear from the chart how often and for how long test taker was violating the rules

100

We can see that the total violations' duration may outrange the session's duration (because violations can be simultaneous, for example, a student looking aside while using his phone), so the **final score is limited to 100%**

Why Examus?

Examus Product Policies

- ✓ “try-before-buy” (trial exams and pilot projects)
- ✓ everyone deserves a second chance (exam retakes and second tries uncharged)
- ✓ scalability works both ways: running projects from 25 to 25k exam-takers
- ✓ flexible pricing options
- ✓ allocated Customer support team and guidance during exams
- ✓ respect and account for culture-sensitive aspects

Examus advantages

Patented AI technology

User-friendly interfaces

Multilingual interface

Protection from passing exam without proctoring

Training and support from Examus team

Deployment to customer's infrastructure (optional)

Functionality for proctoring oral exams

Open API for integration with LMS

Team of experienced proctors (optional)

Supports international acts on data privacy and accessibility of service

FERPA
Family Educational
Rights & Privacy Act

examus

ADA Compliant

International
Organization for
Standardization

Examus Support
