Examus Flexible Online Proctoring Solution

Examus Inc. has developed advanced AI proctoring solution that prevents cheating attempts during online exams as well as monitor and control students' behavior during the examination process. Examus enables universities to get verified results from online exams. Examus enables students to study and take exams remotely from anywhere in the world. The main aim of Examus is to improve the educational process and make it easy and affordable to everyone to study remotely and receive verified exam results.

The key advantages for Examus online proctoring solution are:

Patented AI technology

User-friendly interfaces

Multilingual interface

Protection from passing exam without proctoring

Training and support from Examus team

Deployment to customer's infrastructure (optional)

Functionality for proctoring oral exams

Open API for integration with LMS

Team of experienced proctors (optional)

Examus patented proctoring solution based on computer vision and artificial intelligence has already been integrated with the leading testing platforms and learning management systems such as Moodle, OpenedX, Microsoft Teams. Indeed, Examus AI proctoring solution can be integrated into any learning management system (LMS) or testing platform. We describe in details about how Examus proctoring solution works from technology side and why do we need online proctoring. If you have any questions please e-mail info@panafricaskills.co.ke or call +254 718 006 797
